

PHOTON | SOLAR CHARGING BENCH

An exceptionally stylish solar bench featuring natural wood side panels and either carbon steel or stainless steel ends.

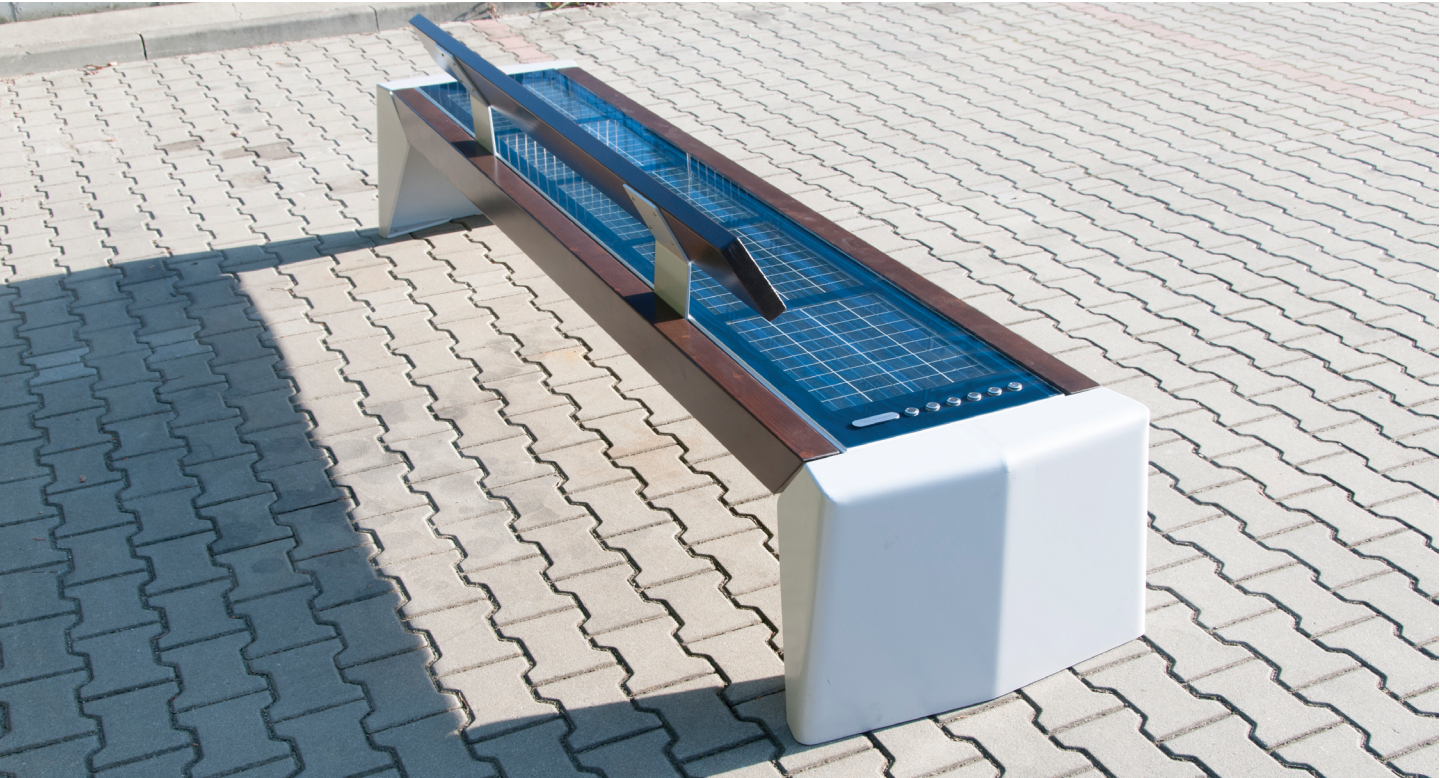

The natural wood side panels set this bench apart from almost all other solar benches. It's a bench that incorporates high-tech solar phone charging capability but still blends perfectly with other traditional benches in any park setting.

For an even more co-ordinated landscape design, order along with our non-solar models with wood slats in place of the solar panels.

While Wi-Fi and speakers are only options with solar models, all Photon benches can be supplied with backrests and bicycle racks.

ADDED COST OPTIONS

- Backrest
- Wireless Qi phone charger
- Wi-Fi module
- Music module with built in memory
- Bluetooth sound module
- Bike stands
- Writing table
