

UNIVERSE | SOLAR CHARGING STATION

A whimsical and colorful charging station with 4 USB A ports and 2 wireless charging pads; vandal resistant overhead solar panels and a handy bench seat.

These unique benches grab attention on their own but when situated with the other benches and planters in the Universe range, the playfulness of the design is emphasized.

Add e-paper signage for announcements and visitor information, bike racks to create an even more multi-functional environment, Bluetooth speakers for impromptu dance parties and Wi-Fi for a fully connected resting session.
